

November 13, 2015

Dear Board members,

I am requesting a GUA boundary change. This change is to boundary 4-11 and 4-16 near Point Adolphus. The current line does not follow a major drainage or ridge that is easily definable. In fact it departs the ridge at some undefinable point and intersects the beach somewhere near the middle of a tidal flat. It would make most sense to reposition the line down the ridge line to Point Adolphus which is the most definable point near this location.

Regards
